

SAKK[®] MAT

Extension Ladder Stabilization

Protecting America's Workforce, One Ladder at a Time

Key Benefits

- Prevents ladder movement: Anchors the top of an extension ladder so it will not move, even on unstable ground.
- Provides a non-slip transition surface for workers stepping on or off a roof.
- OSHA-aligned roof access safety, covering non-slip surfacing and ladder securement.
- Addresses a proven industry need, with 82% of construction managers reporting frequent parapet-style roof access.

Product Features

- Dual-purpose safety device: ladder anchoring and non-slip surface.
- Constructed with durable recycled UV-resistant material.
- Portable: Rolls to 6" x 18" with Velcro; lays out to 48" x 18".
- Proudly made in the USA with clean recycled materials.

Who Is It For?

- Construction companies
- Roofing contractors
- Maintenance crews
- Facility managers
