

Online Training That Works With Your Safety Program

As a West Bend policyholder, you have access to an online **Learning Management System (LMS)** designed to help you train employees and track their progress. It's a focused tool that complements your existing safety program.

What's Included?

Course Library

A library of workplace safety, compliance and industry-specific courses, available in English and Spanish.

Assign & Track

Assign training, set due dates, send automated reminders, and track completion— all from one place. Maintain clear records for your organization.

Mobile & Accessible

Employees can train on any device, desktop, tablet, or phone, making it easy to fit training into their workday.

A Piece of the Bigger Picture

This Learning Management System (LMS) is focused on training content and completion tracking. It works alongside your existing safety program— not as a replacement for it— to help reinforce the safety practices that keep your team protected.

Why It Matters for Your Business

Consistent training

Every employee gets the same quality, expert-built content — every time.

Clear records

Easily track assignments and completions to support your safety and compliance efforts.

Flexible for your team

Mobile-friendly courses fit into busy schedules without classroom time.
